Since the beginning of my professional career, I was always between *design* and *technology*. I was growing in both areas - *frontend* engineering and *ux design*. After some time I took a hat of a *product lead* position. I've learned to work with customer feedback and *scoping*. On top of that, I started working with *design systems* which is my apple of the eye.
With my experience and knowledge, I'm feeling comfortable in working with product teams and understand needs and priorities of every part of the organisation.

PROFFESIONAL EXPERIENCE

Staff Frontend Engineer & Product Owner / Design System
april 2023 – april 2024 | 1 yr 1mo • Adverity • Vienna, Austria / Remote

- I'm developing a *typescript* and *react* based internal Design System
- Support less experienced engineers and unblock all obstacles they they encounter
- I'm leading *product ownership* of the Design System by developing a comprehensive scope for the team's *roadmap* (short and long-term) and creating essential documentation for business approval.
essential skills: *react • typescript • storybook • cypress • vr testing • design systems • scoping • product ownership*

Senior Frontend Engineer / Design System
august 2022 – mar 2023 | 8 mos • Adverity • Vienna, Austria / Remote

I was building react and *typescript* based Adverity's Frog Design System and supporting product teams in implementing design system standards during feature development.

essential skills: *react • typescript • storybook • cypress • visual regression testing • design systems*

Design Systems Consultant
march 2021 – present | 2 yrs 11 mos • bartoszdebicki.com • Gdynia, Poland / Remote

I'm helping companies in UX and Design Systems areas.
Selected companies I helped: Software Development Academy, Intelliseq, Brainly and UXPin.

essential skills: *design systems • responsive design • figma • figma plugins*

Senior Design Technologist & Tech Lead
october 2018 – april 2022 | 3 yrs 7 mos • UXPin • Gdańsk, Poland

- as a design technologist, I was owning (*developing, managing*) the internal react based UXPin design system; I was leading the UXPin Merge project on product nad UX / DX level as well as building react based feature UI.
- as a tech lead, I was *leading and managing the team* of UI developers in the company, as well as be *involved in the recruitment* process to the Engineering team; I was responsible for a CSS architecture of the editor.

essential skills: *react • lesscss • jest • webpack • product leading • team managing • design • design systems*

Senior Webdeveloper / UX Designer & Product Lead

september 2013 – september 2018 | 5 yrs 1 mo • UXPin • Gdańsk, Poland

- as a product lead, I was responsible for *managing the scope* and coordinating the work of the Development Team on a few key projects in UXPin.
- as a webdeveloper, I was responsible for building the editor's UI using *react*, *less*, *webpack*, and *jest*; I was also responsible for creating architecture of styles and building *electronjs* based UXPin desktop client.
- as a UX designer, I was responsible for creating *wireframes*, complex *prototypes* with *documentation*, and taking care of good user experience based on their feedback analysis.
- in my responsibilities was also participating in *hiring* and onboarding new UI developers.
- I was leading and developing our internal *design system*.

essential skills: *react* • *lesscss* • *jest* • *webpack* • *team leading* • *designing* • *product management* • *design systems*

CPO & Co-founder

september 2012 – july 2014 | 1 yr 11 mos • taniprzeglad.pl • Gdynia, Poland

I was responsible for the product side of the project including product management, visual design, user experience, html/css/js code.
